

# Gas Fitter's Licensing to begin in October!

Are you licensed to perform gasfitting?

Check out our website at  
<http://www.nh.gov/safety/divisions/firesafety/building/mechanical/gasfitters/index.html>

for latest information on the new gas fitter's licensing law.  
Don't get left behind!!

## Common myths on new gas fitter's licensing rules

- I have to obtain six different licenses to stay in business.
  - o Wrong. Only one license is required per licensee. You may have multiple endorsements on your license depending on the type and scope of work that you do.
- I am going to be charged a separate licensing fee for each specialty license that I apply for.
  - o Wrong. Each applicant will only be charged one fee, no matter how many endorsements they choose.
- I have to go to school or take a test to become licensed.
  - o Those choosing the existing technician application route will only have to demonstrate a minimum of 8000 hours of experience obtained prior to January 1, 2007 and some training to become licensed.
  - o Those choosing the normal application route will have to demonstrate successful completion of one of the approved training curriculums
